Simple Game Brief

Due Date: March 18th no later than 3:15pm on Blackboard

Description:

Write code and create a basic interface for a <u>simple</u> game. The game should be a <u>single screen game</u> and <u>one level</u>. You can have instructions if necessary. Use the knowledge you have gained so far about multimedia design and interaction to create this simple interactive game.

Ideas will be discussed in class.

Submit the game in a format that can be opened independent of the software you used to create it. Submit the game in a zipped folder with your first and last name as the folder name.
